JUSTIN JONESY

AV AND STAGE REQUIREMENTS

Every presentation is designed to maximise the experience for the audience. To ensure the audiovisual arrangements seamlessly complement the overall presentation, Jonesy will bring his:

- Apple Macbook Pro laptop to play presentation as the file is large (5gb).
- USB or HDD stick with back up presentation pre-loaded
- Necessary adapters (VGA, DVI and HDMI to Mac connectors)
- USB forwarder (to advance slides)

Due to the size and particular program used (Keynote) a separate copy of the presentation will not be able to provided prior to the event.

Jonesy presents to a large range of different size audiences and is happy to adapt to the individual requirements for each presentation (depending on room size & shape, screen availability & size, audience seating etc). However generally as a minimum include:

1	2	3	4
Digital Projector or large screens	Speaker system (3.5mm or USB)	1 x lapel or headset microphone	1 x bottle of still water

Additional Notes
- Jonesy's presentation has been designed to be 16x9 or 1920x1080, but works in a 4:3 ratio.
- Once MC begins introducing Jonesy, AV team please switch to Jonesy's keynote holding page immediately.
- AV team to darken room for all videos
- For large audience, roving microphone for Q&A
- Stage preferences:
    - Jonesy walks around stage and prefers minimal items (such as chairs, tables, banners etc) on stage. Lectern is OK.
    - Stage lighting: ensure entire stage is lit and there is minimal lighting bleed onto screens
    - Dark lighting for audience

Jonesy is committed to making your event a memorable & positive experience. They are always available to discuss their requirements or any special requests with the AV team or events organiser.
